Interactive graphs

Most graphs on the QOOL Dash are interactive, the **exception** is the 'Do my patients have their minimum data set complete?' found on the MDT Activity page. Please see below for further information on this graph.

Indicates the graph is interactive, user is able to click through to make further selections and filter the page to the selection made

Indicates graph is interactive

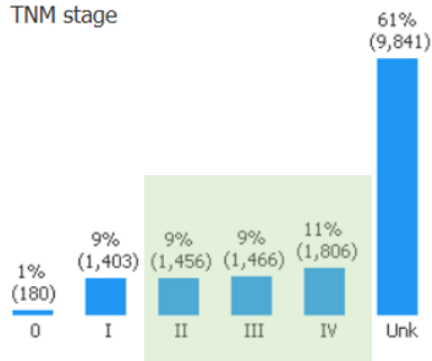

Indicates the graph/image is **not** interactive

This arrow is used to click back to previous selection

TNM stage

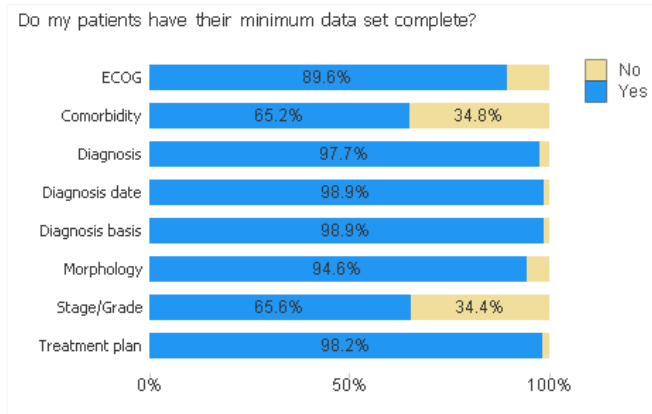

To make multiple selections on one graph, click on the graph and drag to cover the area you would like to know more about. The highlighted green indicates chosen selections. The page will then filter to these criteria

Comorbidities

Non interactive graphs

Most graphs are interactive, the exception is the graph below:

Further information on patient's with an incomplete data set can be retrieved by clicking on 'Patient Details' Fields which are blank or 'Unk', indicate data is missing for these patients.
