

Cancer Alliance Queensland

Strategic Priorities

2024

Cancer Alliance Queensland (CAQ) is a collaboration between Queensland Cancer Control Analysis Team, Cancer Control Safety and Quality Partnership (The Partnership), Queensland Cancer Register and leading research, academic and clinical institutions (public and private) with a shared mission of improving outcomes for Queenslanders affected by cancer.

FOR ALL QUEENSLANDERS WITH CANCER

Our 2024 priority business plan outlines key strategies aimed at realising our goals of engagement, leadership and impact. We're committed to achieving measurable success and providing clear insights into how the healthcare system performs, to help improve cancer care delivery and patient outcomes.

VISION

Driving excellence and equity in cancer care by accessing, analysing and actioning data

Excellence: Striving for excellence in its own operations and helping others achieve and assess excellence in their own contexts.

Equity: Promoting fair outcomes across different dimensions, including geography, social status, culture, and economics.

Access: Ensuring access to information from public, private, and community sectors, and facilitating access to relevant information for diverse stakeholders.

Analysis: Collecting and analysing information to produce valuable insights that support stakeholder needs uniquely.

Action: Creating information products and assisting stakeholders in leveraging them to drive positive outcomes in cancer care activities.

OUR KEY THEMES

Engagement

enhanced stakeholder awareness, empowering healthcare professionals, empowerment through information

Leadership

governance and funding optimisation, collaborative leadership, data excellence

Impact

advocacy and support, service integration, equity focused, access to data, alignment with Australian Cancer Plan

Our key priorities in 2024

Engagement

- 1 Build stronger relationships with key figures like the Health Minister and Executive Leadership to promote CAQ's role in improving cancer care statewide.

Leadership

- 2 Develop a plan and business case for operating more independently. Establish the new entity and transition to new governance and funding arrangements.

Impact

- 3 Collaborate on initiatives aimed at addressing equity issues within Queensland and under the Australian Cancer Plan. Establish subcommittees for Consumers and First Nations Peoples.

Leadership

- Promote the importance of multidisciplinary teams approach to cancer care and improve data management for informed decision making.

Impact

- Develop a business case and undertake cost-benefit analysis to establish a cancer data services unit.

Impact

- Develop targeted information resources that support the development of policies and strategic directions for cancer care, and integrated cancer care across different sectors.
