History of Cancer Codes

Because the ICD-O-3 classification does not include Z-codes, these codes cannot be used as the primary site for cancer registration with the Queensland Cancer Register (QCR). To ensure accurate reporting, it is recommended that facilities implement an internal system flag prompting staff to complete a cancer registration whenever a relevant Z85 “personal history of malignant neoplasm” code is assigned during an admission.

When this occurs, the cancer registration must be submitted using the corresponding ICD-10-AM C (malignant neoplasm) code that reflects the original cancer site.

Example
